ALAHRAMAT STEEL

Metal & Steel Constructions | Structural Steel | Industrial Solutions

ALAHRAMAT STEEL is a specialized metal and steel construction company based in Abu Dhabi, UAE, providing integrated engineering solutions across design, fabrication, and on-site installation to deliver durable, safe, and high-quality steel structures that meet international standards.

About Us

ALAHRAMAT STEEL is a leading and specialized company in metal and steel construction and structural steel works, headquartered in Abu Dhabi, United Arab Emirates. The company was established on the principle of integrating engineering innovation with industrial quality to deliver safe, durable, and sustainable steel construction solutions.

We are distinguished by providing fully integrated services that start from detailed engineering design, continue through precise fabrication in advanced workshops, and conclude with professional on-site installation. All our operations are carried out in strict compliance with international quality and safety standards.

At ALAHRAMAT STEEL, we are committed to delivering steel structures that combine strength, efficiency, and long-term performance. Our client-focused approach and technical expertise allow us to support industrial, commercial, and infrastructure projects with reliability and confidence.

VISION & MISSION

VISION

To become the most trusted and preferred partner in delivering innovative steel construction solutions, and to be a recognized contributor to the development of major industrial and infrastructure projects across the Gulf region.

MISSION

To provide integrated and customized engineering and industrial services through the application of advanced technologies and highly qualified professionals, ensuring the delivery of projects that exceed quality expectations while meeting the highest standards of

OUR VALUE

Quality & Excellence

We do not aim merely to complete projects, but to deliver final products distinguished by superior quality, durability, and extended service life.

Safety First

We strictly adhere to the highest Health, Safety, and Environment (HSE) standards across all stages of our operations to protect our workforce clients, and assets.

Commitment & Reliability

Meeting project deadlines and approved budgets is a fundamental pillar of our relationship with clients and partners.

Engineering Innovation

We adopt smart engineering solutions and advanced designs that ensure structural efficiency while optimizing cost and execution time.

Our Services

Steel Structures

Design, fabrication, and installation of steel structures.

Construction of warehouses, hangars, and large-span storage facilities.

Development of industrial buildings, commercial complexes, and multi-story steel structures.

Supply and execution of Pre-Engineered Buildings (PEB).

Metal Stairs & Platforms

Fabrication and installation of external fire-rated emergency staircases.

Design and execution of internal steel staircases and steel elevator structures with modern aesthetics.

Manufacturing of safety handrails, walkways, and access platforms for industrial facilities.

Roofing & Steel Shades

Roofing solutions for factories and commercial buildings using insulated and metal panels.

Design and installation of car parking shades, entrance canopies, and recreational area shelters.

Execution of decorative and architectural steel shades, including laser-cut designs.

Metal Fabrication & Iron Works

Fabrication of custom metal doors, windows, grills, and specialized steel elements.

Professional welding, cutting, and precision metal finishing works.

Customized metal solutions tailored to project requirements.

Quality Policy

ALAHRAMAT STEEL is committed to implementing a comprehensive Quality Management System to ensure consistent excellence across all projects. Our quality policy is achieved through:

Using high-grade steel and internationally approved raw materials.

Conducting strict inspections and testing to ensure the integrity of welding points and steel structures.

Providing continuous training and development programs for technical staff and engineers.

Full compliance with all applicable laws, regulations, and standards of the United Arab Emirates.

Our objective is to deliver safe, reliable, and high-performance steel structures that meet client expectations and industry best practices.

OUR PROJECTS

Steel Fabrication Works

Steel Fabrication Works include precision manufacturing of steel components carried out in fully equipped workshops to meet project specifications.

Steel Fabrication Works involve advanced cutting, welding, and assembly processes carried out under strict quality control systems.

Steel Fabrication Works deliver reliable and customized steel solutions that meet project requirements and exceed industry expectations.

Steel Fabrication Works support industrial and construction projects through efficient production, durability, and operational reliability.

Al Shamkha Commercial Market

Al Shamkha Commercial Market is a modern commercial development designed to support retail activities through efficient and well-structured steel construction.

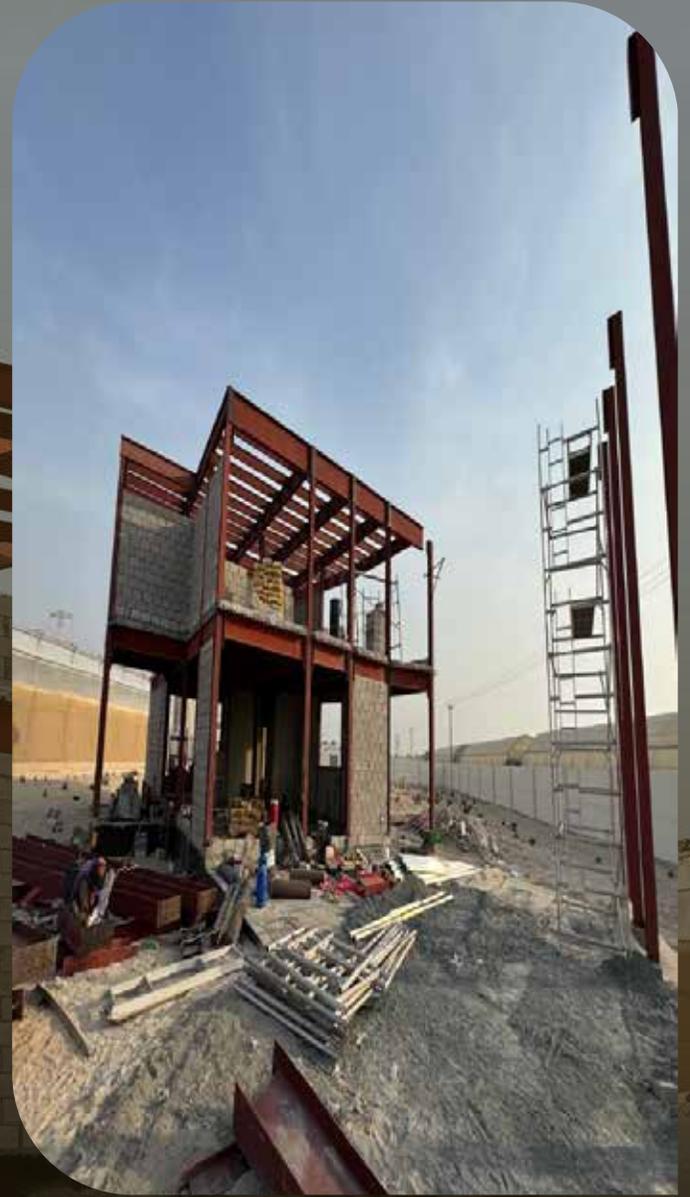

Al Shamkha Commercial Market stands as a dynamic commercial destination built with strength, functionality, and contemporary architectural design.

Al Shamkha Commercial Market provides flexible commercial spaces designed to enhance business operations and customer experience.

Al Bahya Villa

Al Bahya Villa is a residential project executed with attention to architectural detail and high-quality construction standards.

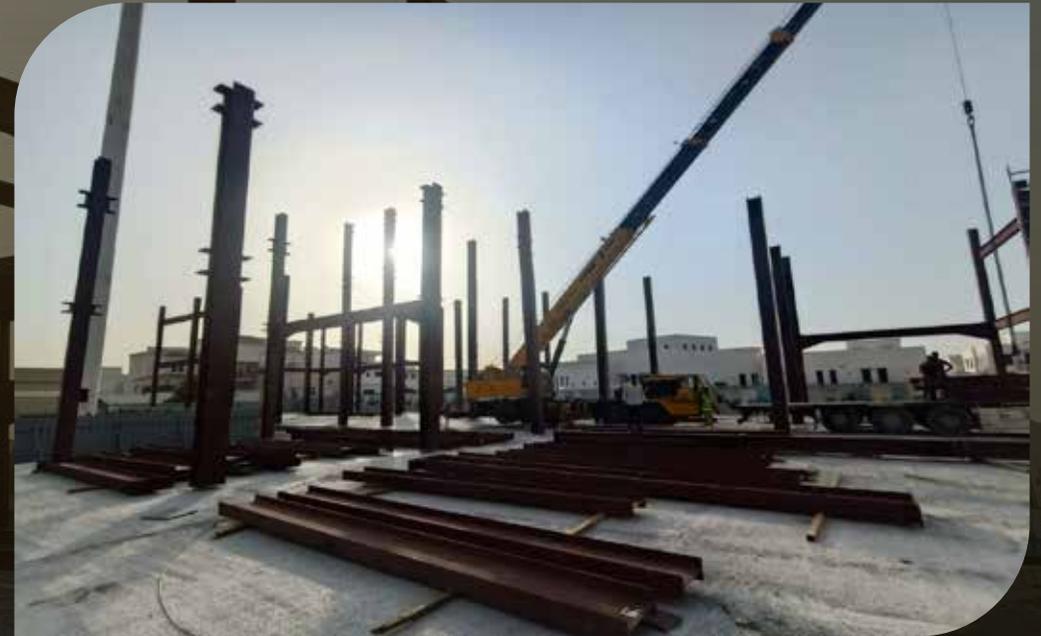

Al Bahya Villa reflects elegant living through modern design, premium materials, and refined workmanship.

Al Bahya Villa demonstrates our capability in delivering high-standard residential projects with precision and professionalism.

Mohammed Bin Zayed Commercial Market

Mohammed Bin Zayed Commercial Market is a well-planned commercial project designed to support retail and business activities through reliable construction solutions.

Mohammed Bin Zayed Commercial Market represents a modern commercial destination built with strength, efficiency, and contemporary design.

Mohammed Bin Zayed Commercial Market is a steel-structured facility engineered to meet durability requirements and international safety standards.

Mohammed Bin Zayed Commercial Market offers flexible commercial spaces designed to enhance operational efficiency and customer flow.

Mohammed Bin Zayed Commercial Market reflects our expertise in delivering high-quality commercial projects with professional execution and on-time delivery.

Villa Elevator Installation & Extension – Abu Dhabi

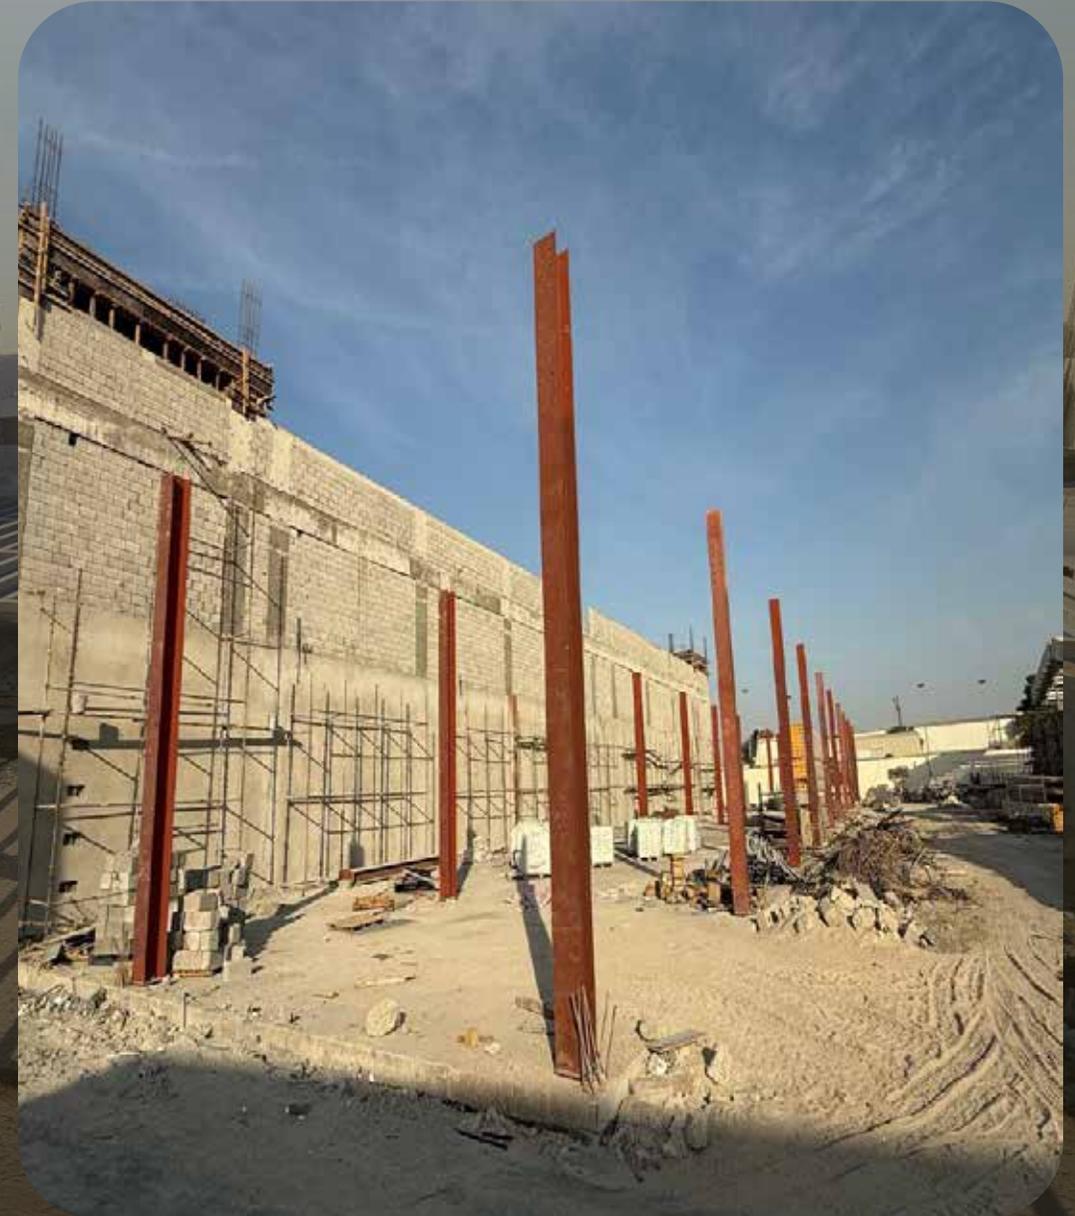

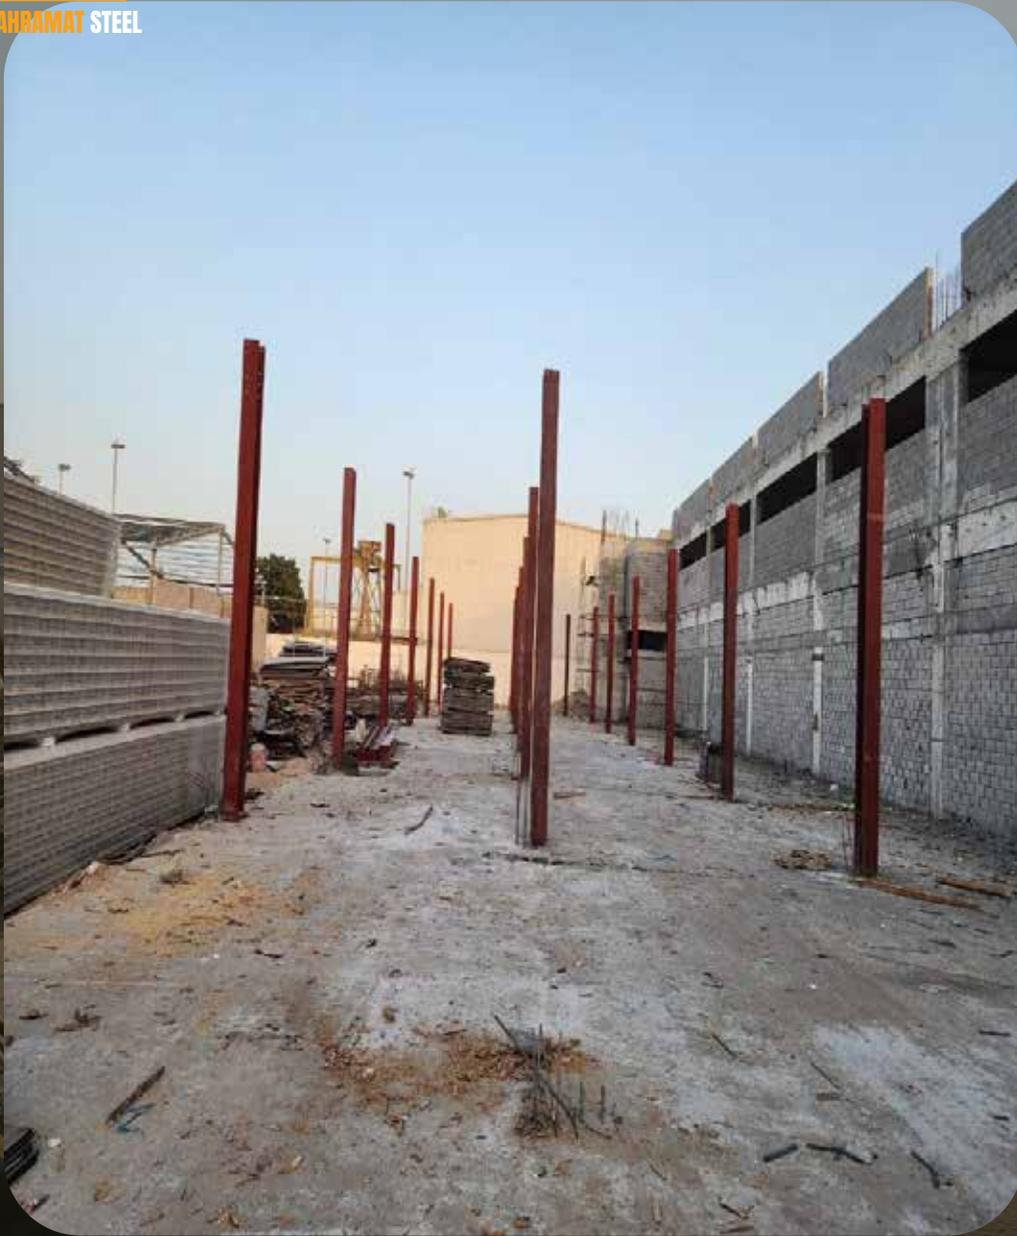

This residential upgrade focuses on enhancing vertical mobility through the integration of a modern elevator system.

The project demonstrates expertise in executing complex residential modifications with accuracy and professionalism.

Mussafah Industrial Projects

These industrial developments were executed to support manufacturing and operational facilities through reliable construction solutions.

The projects deliver high-performance industrial environments built for strength, efficiency, and long-term operation.

They incorporate advanced steel structures designed to withstand demanding industrial loads and conditions.

The developments provide functional spaces that enhance productivity and operational workflow.

The projects reflect strong technical capability, quality execution, and adherence to industrial standards.

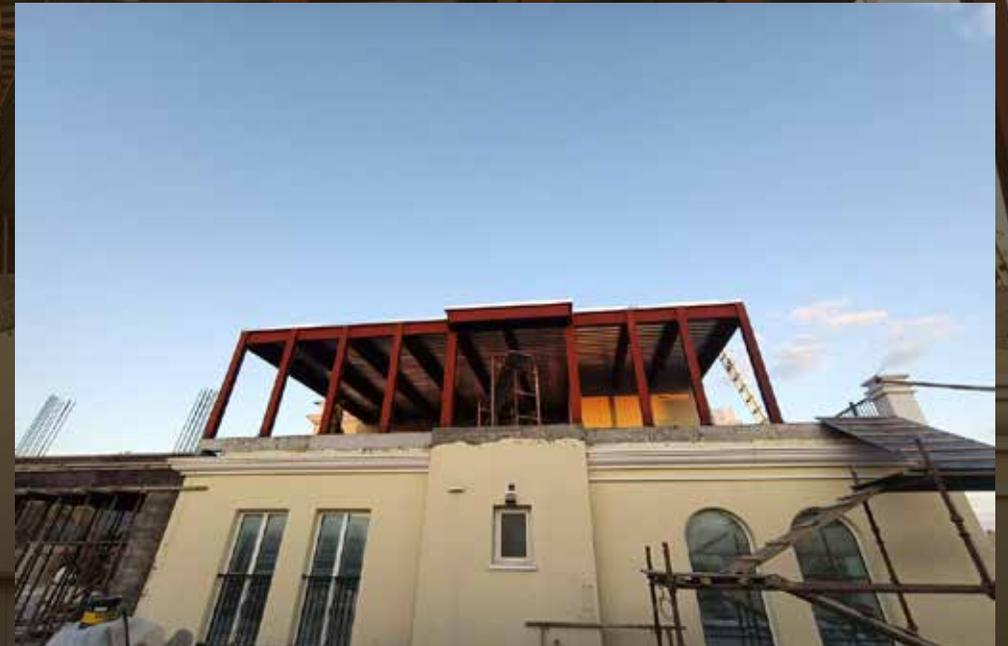

These industrial developments were executed to support manufacturing and operational facilities through reliable construction solutions.

Al Falah Area Extensions

These structural additions were developed to enhance existing facilities and expand usable spaces efficiently.

The works add long-term value through smart design, reliable materials, and precise execution.

They involve engineered steel extensions implemented to ensure structural integrity and safety compliance.

Jebel Ali Industrial Sheds

These industrial facilities were developed to support storage and operational requirements with efficient construction solutions.

The sheds deliver strength, flexibility, and high-performance structures suited for industrial use.

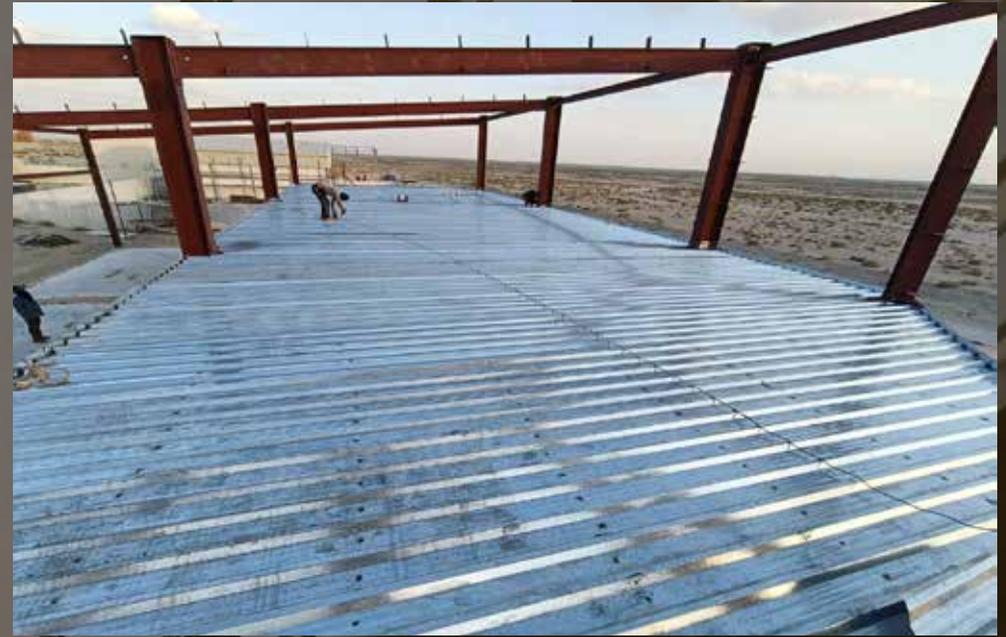

They utilize engineered steel systems designed to ensure structural stability and durability under industrial conditions.

The spaces are optimized to enhance workflow, accessibility, and operational efficiency.

The project demonstrates capability in delivering industrial steel structures with quality execution and timely completion.

These industrial facilities were developed to support storage and operational requirements with efficient construction solutions.

Al Ghayathi Commercial & Industrial Sheds Group

This group of commercial and industrial sheds was designed to provide flexible and functional spaces for retail and industrial operations.

The development combines strength, modern design, and efficiency to create high-performance commercial and industrial facilities.

Engineered steel structures were implemented to ensure durability, safety, and compliance with international standards.

The sheds optimize operational workflows and provide versatile spaces to meet diverse business requirements.

The project reflects expertise in executing large-scale commercial and industrial constructions with precision and professionalism.

The development was executed using durable materials and efficient steel systems to ensure long-lasting performance and minimal maintenance.

Advanced structural solutions were applied to deliver versatile and resilient commercial and industrial spaces.

Al Ghayathi Commercial & Industrial Sheds Group

This group of commercial and industrial sheds was designed to provide flexible and functional spaces for retail and industrial operations.

The sheds deliver strong, reliable, and high-performance structures suitable for demanding industrial environments.

Engineered steel systems were implemented to ensure structural stability, load efficiency, and long-term durability.

Marina Mall Development Works – Abu Dhabi

The scope included advanced construction activities aligned with international commercial standards.

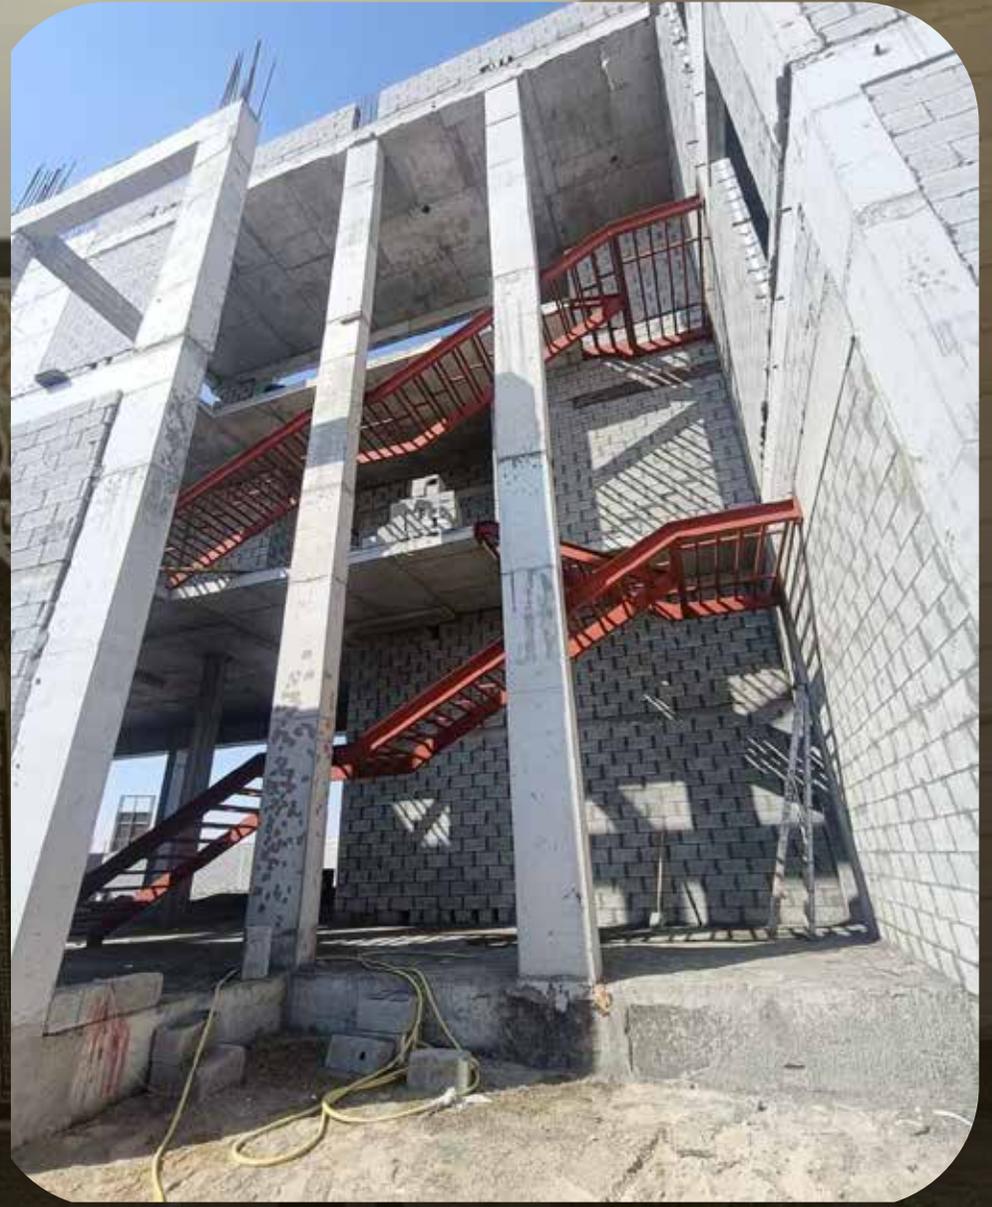

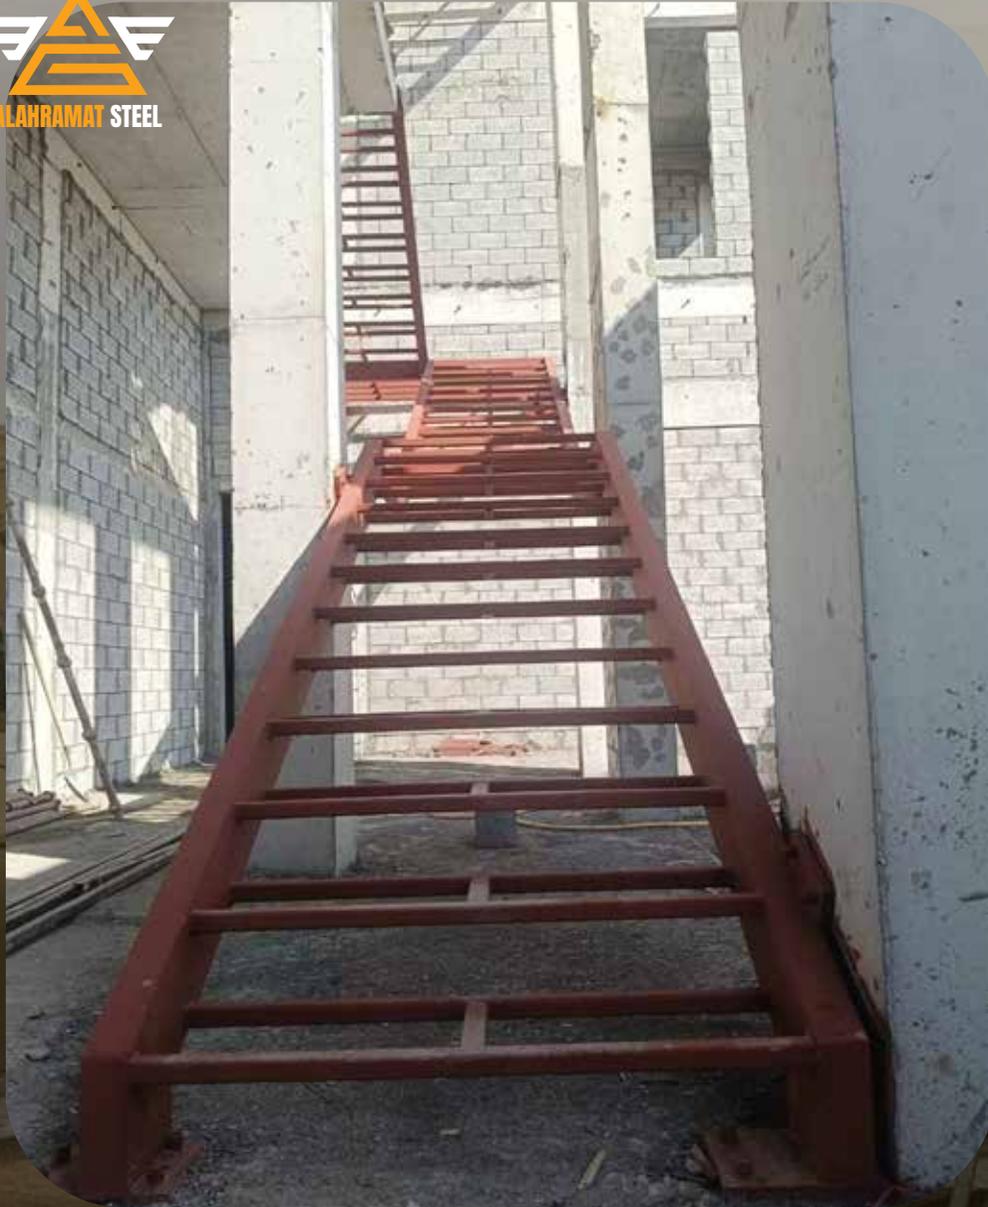

Execution focused on precision, safety compliance, and seamless coordination between all teams. High-quality finishing works were delivered to match the premium nature of the location.

Staircases, Handrails, Canopies & Interior Additions Works

The works focused on enhancing functionality while maintaining a modern architectural appearance.

Execution combined structural safety with refined finishing details.

Materials were selected to ensure durability, stability, and visual consistency.

Interior enhancements were implemented to improve user movement and overall comfort.
